Federation Manager

This section provides information about how to use PKIFED Federation Manager Portal.

Login

To log in, please visit the following URL: <u>https://rr.pern.edu.pk/rr3/</u>. Click the Log in button (red button) at the top right to open the login window.

Enter the username and password (PKIFED provides Federation Member an username and password to login to the Federation manager.), after that click the "Sign in" button. If the username and password are correct, the main screen will be opened.

Register Identity Provider (IdP) Service

To register your Identity Provider (IdP) service, Click Register->Identity Provider as shown below:

← → C ŵ ① ▲ https://rr.pern.edu.pk/rr3/	809	(♥ ☆	Q Search			$\overline{\mathbf{A}}$	III\ 🖽	6	J 1 G	କ୍ ବ୍	● ≡⁴

Alternatively, you could input your IdP metadata manually by leaving the Metadata box empty and click the "Next" button.

Despite you choose to input your metadata by filling the Metadata box, you should review the information provided by the Metadata before submitting the Metadata information for approval by the PKIFED Federation administrator as some information may be missing/not available as wasn't provided by the Metadata. In case of missing information, you could simply add it by filling the text field to provide the information. Please take note that the more detail information is the better as the Service Provider may utilize this information for a custom service.

Click the "Contacts" tab to review/enter the Contacts information. There are several types of contact that you can choose by clicking the Type drop-down menu.

To add more contact, simply click the "Add contact" button.

The eduGAIN inter-federation requires the Contact information to use a service email account instead of an individual email account.

Abkhaz (ab)	Add in new language	
	Had in new ranguage	
Description of user community serviced		
English (en)	Higher Education Commission	Remove
		G is.
Abkhaz (ab)	Add in new language	

Click the "UI information" tab to review/enter the UI (Display) information. This information typically used by the SP or Discovery Service (DS) to list the name of IdP.

The step to enter the information is pretty much similar to like entering information on the Organization. You can put the information in multiple languages.

um:oasis names to: SAML 2.0 bindings HTTP- Redirect Redirect						
um oasis names to SAML 2.0 bindings SOAP						

Click the "SAML" tab to review/enter the SAML configuration information. The information in this tab has to be very accurate as the SAML middleware (e.g. Shibboleth or SimpleSAMLphp) will use this information to set up the SAML/communication operation. Please refer to SAML metadata specification and SAML middleware documentation for the explanation of each configuration point.

JAGGER Federations Identity Providers S	Service Providers Register Administration -			Eħ	• •	•	۴

	http://www.w3.org/2001/04/xmlenc#aes128-obc						

Finally, the "Certificate" tab shows the IdP public key certificates that is used to secure the communication channel.

Once you finish reviewing/updating the Metadata information, click the "Register" button at the bottom of the page for the Federation Manager administrator to review the application.

Once the administrator approved, your IdP metadata will be included in the Federation Metadata.

Register Service Provider (SP) Service

The steps to register a Service Provider (SP) service is pretty much similar to an IdP, hence you could follow the steps for an IdP to register an SP service. The main difference is instead of clicking "Register->Identity Provider" menu, you shall click the "Register->Service Provider" menu to register an SP service.
